

Parabola meets X axis

$$\begin{array}{c} x^2 = 9 \\ \swarrow \quad \searrow \\ x = 3 \quad \quad x = -3 \end{array}$$

$$\begin{array}{c} x^2 = 4 \\ \swarrow \quad \searrow \\ x = -2 \quad \quad x = 2 \end{array}$$

$$\begin{array}{c} x^2 = 16 \\ \swarrow \quad \searrow \\ x = -4 \quad \quad x = 4 \end{array}$$

$$\begin{array}{c} x^2 = 1 \\ \swarrow \quad \searrow \\ x = -1 \quad \quad x = 1 \end{array}$$

-3 . (-3) = 9

-2. (-2) = 4

-4. (-4) = 16

-1. (-1) = + 1

$$\begin{array}{c} x^2 = \frac{1}{4} \\ \swarrow \quad \searrow \\ x = -\frac{1}{2} \quad \quad x = +\frac{1}{2} \end{array}$$
